SPECIFICATIONS FOR FRESH SWEET POTATOES FOR PROCESSING

1. **Grade** - U.S. No. 2 or better for Sweet Potatoes for Dicing or Pulping.
2. **Cured** – Applicant warrants sweet potatoes are cured according to standard curing procedures.
3. **Pack** – Bulk
4. **Crop Year** – The sweet potatoes shall be from the current packing season/crop year.
5. **Size** – Whole sweet potatoes shall be specified not less than 1.75 inches to 3.5 inches in diameter. Maximum diameter roots must pass freely through a 3.5 inch inside diameter tube.
6. **Varieties** – Beauregard or Covington. Varieties can not be mixed.
7. **Defects, Serious Damage, and Foreign Material:**
 - a. Sweet potatoes should be run on sizing and dirt removal belt prior to loading.
 - b. Any load of sweet potatoes found to contain broken glass or foreign substance, which may be harmful to health or adulterates the finished product, will be rejected.

8. Domestic Product Requirement:

Documentation is required to support the domestic origin of the product.

9. Grading and Inspection:

- a. Inspection must be performed by Federal, Federal-State, or Inspection Service.
- b. Product will be inspected as delivered at destination using one of the following methods:

Sampling Methods:

Sampling may be drawn either by hand or mechanical techniques

- a. **Hand Sampling:** Sample obtained by manually passing a tray through the flow of sweet potatoes by a USDA inspector or an approved sample puller. Sample puller may be a processor employee.

- b. **Mechanical Sampling:** Sample obtained mechanically by a trained and approved sample puller. (Federal Inspection Service must approve all mechanical samplers)

Samples may be graded individually or aggregated by either of the following

- a. Each truck load is graded and certified individually.
- b. Grading and certification can include that days run for individual growers and a single days harvesting from the same field for the individual grower constitutes a combined sample

Sampling Procedures:

- a. Samples should be representative of the load and the number of samples selected in accordance with USDA handbook instructions.
- b. Sampling is performed by either method a. or b. as identified in the Sampling Method above.
- c. Samples should be taken from the back, middle, and front of the truck as it is unloaded.
- d. After the sample is drawn, it is then carefully deposited in a sample bin(s). Sample slips/scale tickets bearing pertinent information are either inserted in the bin or attached to the outside of the bin.
- e. Sample bins are submitted for grading, where they are individually weighed and handled by machinery and dumped mechanically. This method helps to stabilize the accuracy and helps to eliminate bruises caused by handling of samples.

10. Invoices and Payment: Invoices and payment will be in accordance with Section X. Invoices and Payment, Announcement FV-320.

11. Good Handling Practices (GHP), Good Agricultural Practices (GAP), and Food Defense Audits:

GHP/GAP verification and an annual Food Defense Audit will be performed by the Fresh Products Branch beginning July 1, 2007. Verification will be based on the supplier's ability to meet the minimum score in each category for the entire system from field to receiving. Verification must be completed no later than 10 days prior to the first day of the contract delivery period for the first load on the contract. A copy of the GHP/GAP and the Food Defense Audit tool for fresh commodities is available at <http://www.ams.usda.gov/fv/fpbgapghp.htm>.
